

CE 311k – McKinney Extra Credit Problem 1 Solution

Part 1.

```
Project1 - Form1 (Code)
Command1 Click
Private Sub Command1_Click()
    ' Define and initialize variables
    Dim REFOREST_RATE As Double, UNCUT_ACRES As Double, MAX_ACRES As Double
    Dim forested As Double, acres As Double
    Dim year As Integer, k As Integer

    REFOREST_RATE = 0.02
    UNCUT_ACRES = 2500
    MAX_ACRES = 14000
    year = 0
    forested = UNCUT_ACRES

    ' Read number of years
    year = Text1.Text

    ' Print headings
    Picture1.Print "YEAR      FORESTED ACRES AT END OF YEAR"
    Picture1.Print "-----"

    ' Compute and print yearly reforestation information
    k = 1
    Do While k <= year And forested <= MAX_ACRES
        forested = forested * (1 + REFOREST_RATE)
        Picture1.Print k, forested
        k = k + 1
    Loop

    ' Print years required for reforestation
    Picture1.Print
    Picture1.Print "In "; year; " years "; forested; " acres are reforested."

End Sub
```

Form1

Enter year:

YEAR	FORESTED ACRES AT END OF YEAR
1	2550
2	2601
3	2653.02
4	2706.0804
5	2760.202008
6	2815.40604816
7	2871.7141691232
8	2929.14845250566
9	2987.73142155578
10	3047.48604998689
11	3108.43577098663
12	3170.60448640636
13	3234.01657613449
14	3298.69690765718
15	3364.67084581032
16	3431.96426272653
17	3500.60354798106
18	3570.61561894068
19	3642.0279313195
20	3714.86848994589

In 20 years 3714.86848994589 acres are reforested.

Part 2.

```

Project1 - Form1 (Code)
Command1 Click
Option Explicit

Private Sub Command1_Click()

    ' Define and initialize variables

    Dim REFOREST_RATE As Double, UNCUT_ACRES As Double, MAX_ACRES As Double
    Dim forested As Double, acres As Double
    Dim year As Integer, k As Integer

    REFOREST_RATE = 0.02
    UNCUT_ACRES = 2500
    MAX_ACRES = 14000
    year = 0
    forested = UNCUT_ACRES

    ' Read number of years
    acres = Text1.Text

    ' Print headings
    Picture1.Print "YEAR      FORESTED ACRES AT END OF YEAR"
    Picture1.Print "-----"

    ' Compute and print yearly reforestation information
    k = 1
    Do While forested < acres And forested <= MAX_ACRES
        forested = forested * (1 + REFOREST_RATE)
        Picture1.Print k, forested
        k = k + 1
    Loop

    ' Print years required for reforestation
    Picture1.Print
    Picture1.Print "In "; k; " years "; forested; " acres are reforested. "

```

Form1

Enter acres to reforest:

5000

Command1

YEAR FORESTED ACRES AT END OF YEAR
