

### **Steady Installation Instructions**

The set-up program is written in Spanish, but the actual software package is in English. To install Steady, take the following steps.

1. Run setup.exe
2. On the first screen, click on Aceptar
3. On the second screen, click on the box with computer icon in the upper left hand corner
4. On the subsequent screens, click on the default option offered.
5. Steady will be installed in the Program Files (x86) folder on the computer
6. Go to the folder and run Steady.exe
7. To make running easier, right click on Steady.exe and create a shortcut on the desktop
